

## CSS INDIA FLAG :

```
<html>

<head>

  <meta charset="UTF-8">

  <title>Indian Flag</title>

</head>

<style>

  h1 {

    text-align: center;

    color: greenyellow;

    text-decoration: underline;

  }

  div{

    margin-left: 280px;

    border-radius: 6px;

  }

  .c1{

    width: 400px;

    height: 100px;

    background-color: orange;

  }

  .c2{

    width: 400px;

    height: 100px;

    background-color: white;

  }

  .c3{

    width: 400px;
```

```
        height: 100px;

        background-color: green;
    }

    img{

        width: 86px;

        height: 86px;

        position: absolute;

        top: 211px;

        left: 720px;

    }
</style>

<body>

    <h1>INDIA FLAG</h1><br><br>

    <div>

        <div class="c1"></div>

        <div class="c2"></div>

        <div class="c3"></div>

    </div>

</body>

</html>
```

**OUTPUT :**

**INDIA FLAG**

## **CONCLUSION :**

The project successfully demonstrates the creation of the Indian National Flag using HTML and CSS. By applying basic styling concepts such as div tags, colors, margins, and positioning, the tricolor design along with the Ashoka Chakra was represented in a simple yet effective way.

This case study highlights how web technologies can be used not only for building websites but also for creative and educational purposes, such as representing national symbols digitally. It reinforces the importance of understanding CSS properties like background-color, positioning, and border-radius for precise layouts.
